

Microbial Tank Farm 1 1973 Experimental Precursor to TimberFish

Microbial Tank Farm 2:  
Recycling effluent to Harvested Plant Material Degradation System

Microbial Tank farm 3:  
Sampling Harvested Plant Material Degradation System Effluent

**Microbial Tank farm 4:**

Transferring Harvested Plant Material Degradation System Effluent to the Microbial Growth System Biorreactor. Clarifier is at lower left.

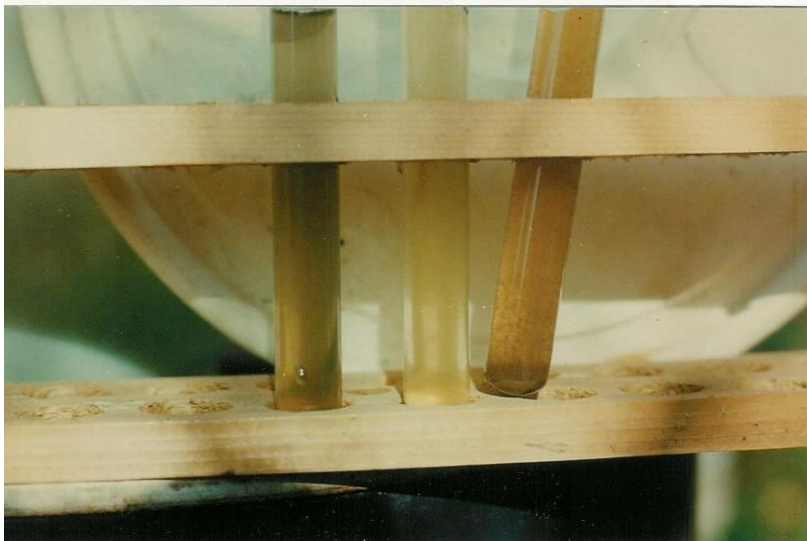

**Microbial Tank farm 5:**

Harvested Plant Material Degradation System Effluent on left

Microbial Growth System Clarifier Effluent in center

Microbial Growth System Biorreactor Liquid showing Suspended Microbial Biomass on right.

**Microbial Tank farm 6:**

Harvested Microbial Solids from the Microbial Growth System Clarifier.

**Microbial Tank farm 7:**

Feeding the Harvested Microbial Solids from the Microbial Growth System Clarifier to Small Intermediary Animals, Minnows.
